

Student Login Information for Google Forms

Students: Most of the surveys you receive at LHS are created using Google Forms. You must be logged into your school Google account to open the surveys. Please use the following instructions to log in.

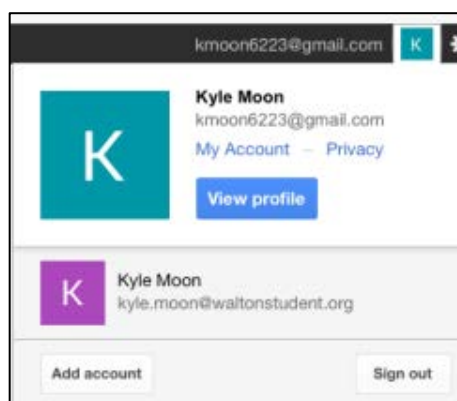

1. Go to Safari or Google Chrome. If there are several tabs open, close them. Once you have only one tab open, type in www.google.com in the address bar.

2. Look in the upper right-hand corner. If you see "Sign In", you will need to sign in with your school login information.
Username: `firstname.lastname@waltonstudent.org`
Password: student ID number

If you already see your `firstname.lastname@waltonstudent.org`, you do not have to do anything.

If you see a personal email address listed, you will need to sign out and sign in with your school login information.

3. Go to your Mail App, and then click on the survey link.

4. Safari will then open and take you to the blue WCSD Google Login page. Login with the following information:
Domain: Choose Student
User name: `firstname.lastname`
Password: student ID number (Lunch #)
Tap Login.

The survey should load once you are logged in.

If it says you still need permission to take the survey, go to Settings > Safari > Clear History and Website Data > Clear. Go back through the steps again on this page.
