

iPad Tip # 5

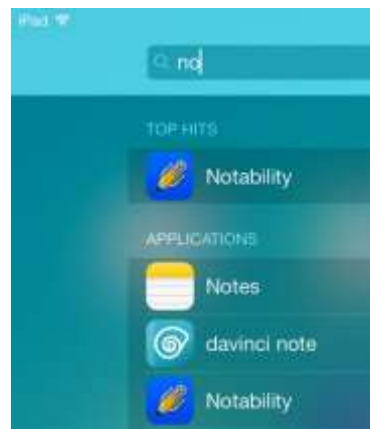

Basic Tip: Spotlight Search

The Spotlight Search lets you find everything on your iPad.

1. Swipe down from the center of the screen. Be careful not to swipe from the top, as that action will pull up the new Notification Center.

2. Use the on-screen keyboard to search your iPad. As you type, the Spotlight Search browses content saved on your iPad such as applications, contacts, and mail.

Advanced Tip: Customize your Spotlight Search

1. Select Settings.

2. Select General from left-side menu and scroll down until you see Spotlight Search in the right column.

3. Select Spotlight Search.

4. You can enable or disable Spotlight Search for specific types of content by tapping on the item. If you deselect an item, it will no longer show up in Spotlight Search.

5. You can change the order in which results are displayed by touching the bars next to an item and dragging up or down the list.
